

Appl. No. 10/681,035  
Amdt. dated December 1, 2005  
Reply to Office Action of November 8, 2005

### REMARKS

In the Office Action of November 8, 2005, the Examiner required restriction under 35 U.S.C. 121 for one of three groups of claims:

(I) claims 1-26 and 35-68 drawn to a method and apparatus for controlling fluid flow in an apheresis system, comprising a first level alarm, pausing fluid flow, and a second-level alarm condition, classified in class 210, subclass 739;

(II) claim 27, drawn to a method and apparatus for controlling fluid flow in an apheresis system, comprising different procedures depending on whether the separation is complete classified in class 210, subclass 739;

(III) claims 28-34, drawn to a method and apparatus for controlling fluid flow in an apheresis system with a single alarm condition, classified in class 210, subclass 739.

Pursuant to 37 C.F.R. 1.143, Applicants hereby elect the invention described as Group I (claims 1-26 and 35-68).

The Office Action further characterizes the claims as directed to two allegedly patentably distinct species: (i) Species A: claims 35-61, drawn to a control system with a processor with first-level and second-level alarm trigger algorithms; and (ii) Species B: claims 67-68, drawn to a control system with a processor claimed to have only one alarm trigger algorithm. Election of a single disclosed Species is required under 35 U.S.C. 121 and Species A is characterized as generic.

Applicants hereby elect Species A which is currently held to be generic. Claims 35-61 correspond to elected Species A.
